

Conf-IRM 2026

25-27 May 2026

Estonian Business School, Tallinn, Estonia

Track 11: Workshops, Tutorials, and Panels

Track Description

Workshops, panels, and tutorial sessions provide the opportunity to present on subjects that are topical and perhaps controversial, and will enable opportunities to enhance the learning experience. The subjects should typically be relatively under-researched or covering concepts that are contested or where differing interpretations are evident. Proposals must therefore be on topics that will engage the audience and will include experts in a discussion or leading a tutorial presentation or workshop that will stimulate interaction, enhance learning, and contribute to the goal of moving the community forward on a topic of your choice. Proposals that are aligned with the 2026 conference theme, Responsible Digital Futures, are especially welcome. Both workshops and tutorials should be for between 2-4 hours (and are usually held on the day before the main conference).

Proposals should include:

1. Title of the panel/ workshop/ tutorial.
2. Description of the panel/ workshop/ tutorial.
3. Objectives of the panel/ workshop/ tutorial – i.e., issues/topics to be covered, recommended audience.
4. The target audience (who, what profile?): Those whose interest you intend to address.
5. Maximum number of attendees.
6. Details of all presenters and panel members – i.e., full name, position, affiliation, contact email.
7. Information about the method of presentation, hands-on materials, and hands-on activities (if applicable).
8. Type of venue layout required.

Evaluation Criteria

The proposals will be evaluated by the track chair based on the novelty of the workshop/panel/tutorial topic, its significance to the field, its alignment with the conference theme, as well as the composition of the organizing team.

Notes

- Method of presentation is at the submitter's discretion.
- The submitter of panel proposals is responsible for organizing his/her own panel members.
- All panelists, workshop, or tutorial presenters must be registered for the conference.
