

Conf-IRM 2026

25-27 May 2026

Estonian Business School, Tallinn, Estonia

Track 2: General Track

The General Track welcomes high-quality research on diverse topics within the broad field of Information Systems that do not have a specific fit with other tracks, including the conference theme track. It aims to attract novel, emerging, or interdisciplinary work and also give authors additional freedom from epistemological, ontological, and methodological perspectives.

Please check the detailed descriptions of other tracks before submitting your paper to the General Track in order to ensure the best possible fit with your submission. After a careful assessment, the General Track co-chairs may move your paper to a more suitable track.

The General Track is also the appropriate track for chairs of other tracks to submit their work, as they are not permitted to submit to their own track.

Track Co-Chairs

Edward Bernroider, WU Vienna, Austria, edward.bernroider@wu.ac.at

Barbara Krumay, Johannes Kepler University Linz, Austria, barbara.krumay@jku.at
